FusionCube 9000

FusionCube 6000

FusionCube 6000C

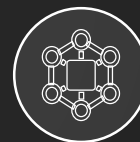

FusionCube 2000

Simplified Management:

- Pre-integration before delivery; deployment completed within 30 minutes
- Unified management of hardware, software, and resources
- One-key O&M, with efficiency increased by 100%

Excellent Efficiency:

- Deduplication and compression supported, 3:1 compression ratio
- 22+2 EC, up to 90% storage usage

Ultra-High-Speed Performance:

- The performance of a single node exceeds 100K IOPS.
- 1 TB data reconstruction takes only 15 minutes, ranking No. 1 in the industry.

FusionCube for ROBO Solution

Plug&Play

One cabinet for firewall, router, switch, server, storage and UPS

Quickly deploy branch within **2 hours**

Attendance-Free

Remotely manage branches devices and resources

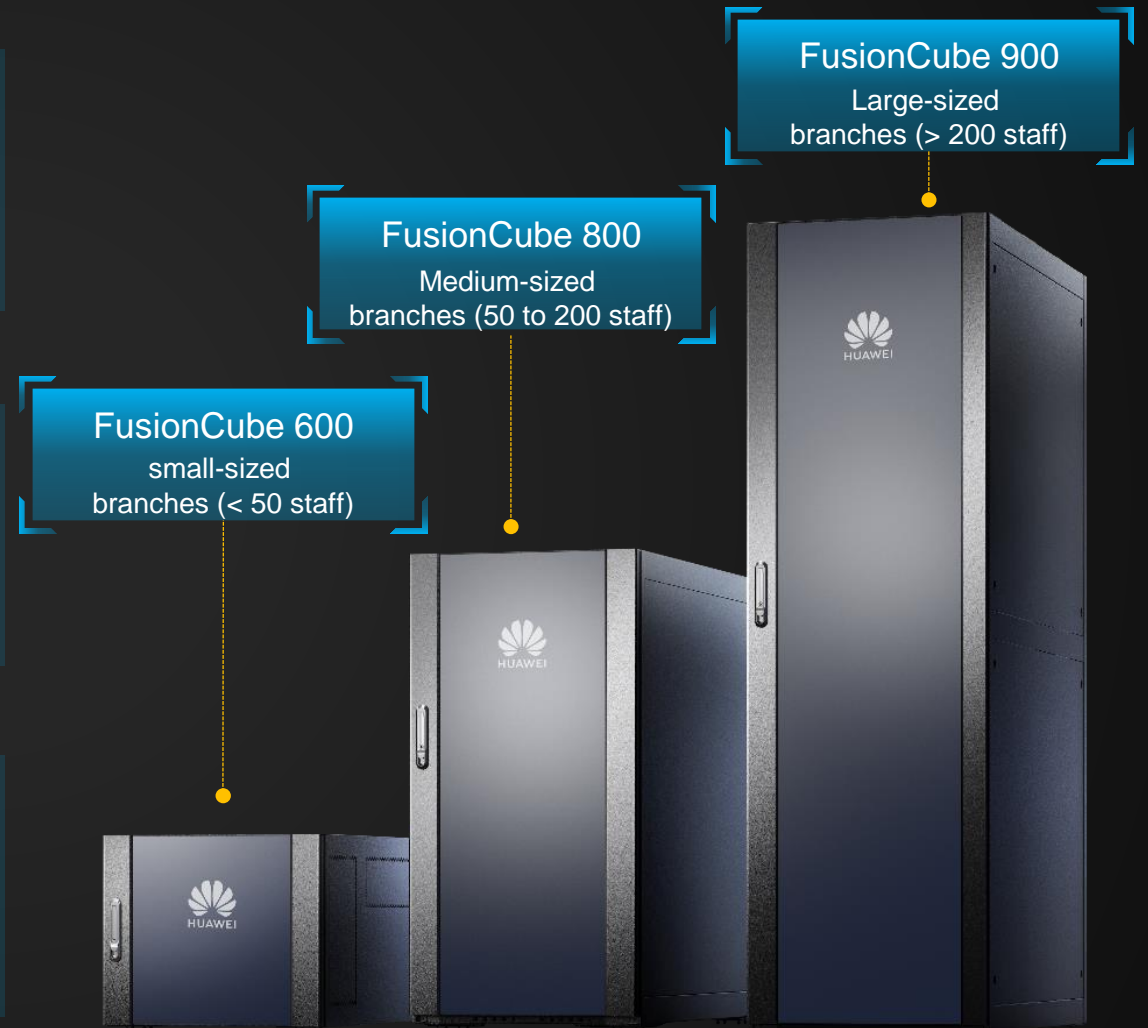

Lower 65% cost of operations

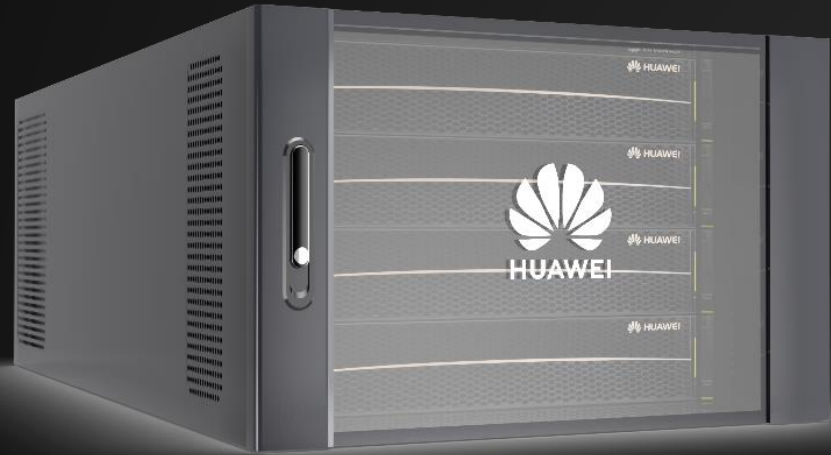

Edge-Cloud Synergy

Applications deployed from center to branches, branch data backup to cloud

Shorten 50% time for online new applications

Simplified Delivery and Management

4 to 1

IT staff required to deploy branch

2Wks to 2Hrs

Branch initialization time

Zero Cost

Space reconstruction

Flexible Access

from mobile app and PC

50% of Data

Processed and stored nearby

65% Lower
